CabMark™

Industrial marking

Your complete solution for marking and identifying cables and components.

A combined solution that covers every aspect of industrial marking.

CabMark™

CabMark™ is a complete marking system for identification of industrial products.

With CabMark™ you are able to mark wire, cables, control panels, components etc.
– In CabMark™ you have an "all-in-one-system".

By using the combined solution of labels, markers and the CabSoft™ software with our high performance printers, you will be able to lower the labour cost in your production.

We offer a wide variety of high quality products. If you require sizes or colours beyond the specified please feel free to make special requests.

Cabicon regularly design and develop new products and will keep you informed as soon there are any changes or news in our program.

To make your marking life easier we offer our customers a service agreement – CSA (CabMark™ Service Agreement)
– with this agreement you are always ensured help when you need it.

Require further information? Call us right now.

Products

CabMark™ CPL

Control Panel Labels (CPL) - raised for special marking

CabMark™ CPL is a high quality label and can replace engraved and plotted plates. CPL is a cost saving label. It saves handling costs up to several times compared to normal plates and together with CabMark™ Printer SQ and E5 you can print them when you need them – no waiting time!

- Good resistance against scratching, smearing and rubbing.
- Excellent UV resistance on printed image.
- High tack adhesive, suitable for rough surfaces.
- Easier, faster, and more cost-effective than engraved metal plates.
- Up to 6 colours: black, white, yellow, silver, red and green.
- Good resistance chemicals such as alcohols and diesel oil.

Standard colours are metal, white, yellow and red.

! **Other colours and sizes can be supplied on request.**

UL conforming.

Material:
Polyethylene overfolie/Polyethen foam, UV stable.

Thickness:
0,6 mm

Operating temperature:
-30° C – +135° C

Application temperature:
+5° C – +40° C

Specification:
Over Foil UL approved.

Colours:
Silver, white, yellow and red - other colours and sizes can be supplied on request.

Printer recommended:
SQUIX-M 4 / E5

Ribbon recommended:
CabMark™ TT CCR / CC XT black

Storage:
In original packing at +15° C – +22° C and 45-55% RH.

Use within 2 years from manufactured.

CabMark™ CMP

PUR cable marker in pre-cut liner format

CabMark™ CMP - high performance cablemarkers made in PUR material. The smart-design with pre-punched markers integrated in the liner - enables you to remove and mount the markers very fast. We call it: Print, rib-off and mount. Together with CabMark™ high performance ribbon you are secured a high print quality - can be used in harsh environments.

Chose between 4 different types - standard type to be mounted with 2 cable-ties. Octave and Manila to be mounted with 1 cable tie. Bonemark is selflocking and needs no cable ties.

Standard colours are yellow and white other colours on request.

❗ **Other colours and sizes can be supplied on request.**

Material:
Polyurethane, zero halogen, UV stable, Flame retardant.

Operating temperature:
-30° C – +90° C

Specification:
Conforming to MIL 81531/
V0 (3mm) according to UL94.

Colours:
Yellow, white, red, black and orange, green, pink, light blue and light green - other colours and sizes can be supplied on request.

Printer recommended:
CabMark™ SQ-M4/300 or CabMark™ E5/300.

Ribbon recommended:
CabMark™ TT CCR / CC XT black.

Storage:
In original packing at 45-55% RH.

Use within 2 years from manufactured.

CabMark™ CMP Bonemark

CMP Bonemark is extremely strong with high tear strenght, suitable for a variety of in and outdoor applications.

Bonemark is a clever solution for marking cables, wires, components and valves etc. Print different information like dates, barcodes or company logos.

It's easy to mount; fold the text area and stick it through the fixation hull and you are finished without using cable ties or other fixation products.

The markers are partially perforated for easy handling after printing and supplied on rolls for thermal transfer printing.

! **Other colours and sizes can be supplied on request.**

CabMark™ CMP-D

Detectable cable markers

Cabmark™ detectable cablemarkers CMP-D – optimized for X-Ray- and Metal-detection.

Made from base material Thermoplastic Poly-Urethane (TPU). It means this product will cope with even the harshest of conditions – while still conforming to the food processing industry's stringent demands for food contact.

Food processing units are recommended to use detectable ID-materials, to ensure reliable extraction in case of unforeseen events.

This product is printed on its own carrier with our recommended ribbon, after which it is easily removeable along the perforations – and ready for attachment with our detectable cable tie's.

Ultimately you will have an elegant solution for the identification of your electrical installations in food procesing.

! **Other colours and sizes can be supplied on request.**

Material:
Polyurethane, zero halogen, UV stable, Flame retardant UL 94 VO (3mm)

Operating temperature:
-30° C – +90° C

Specification:
Conforming to MIL 81531
Hardness: 58 Shore D, DIN 53505

CabMark™ CMW

Wraparound cable markers

CabMark™ CMW – is designed for thermal transfer printing and can be used on all kind of wires and cables.

The material is specially designed for applications where squeezability, conformability and transparency are required. The acrylic adhesive is developed for synthetic face materials. Excellent clarity, UV-stability and good water resistance once labeled.

Good adhesion properties and heat resistance. The advantage of CMW is, that it can be used on already mounted cables - mark your cables without disconnecting anything. The wide range of sizes allows you to use it on very small cables up to large sized cables.

Standard colours are white and yellow.

❗ Other colours and sizes can be supplied on request.

Material:
Polyolefin 2:1 / 3:1. Paper carrier with adhesive tape.

Operating temperature:
-30° C – +125° C

Shrink temperature:
+95° C

Specification:
UL 2556 / MIL-DTL-23053E

Colours:
Yellow and white - other colours and sizes can be supplied on request.

Printer recommended:
CabMark™ SQ-M 4/300

Ribbon recommended:
CabMark™ TT CCR / CC XT black

Storage:
In original packing at 45-55% RH.

Use within 2 years from manufactured.

CabMark™ WMO

CabMark™ WMO - Open sesamy!

Meet our new open product range for wires, easy and efficient to print and mount to established circuits – even on bent wires! Fast printing on endless material allows for fast printing of up to 500 units per minute.

WMO is available for wires with diameters of 1,2-4,0 mm (0,25 to 4 mm2 cross section). WMO comes in 4 different widths and 2 different colors – spanning the most popular range of wires. A nice completion of your terminal blocks, that won't stick out.

Material:
Halogen-free, cadmium and silicone-free.
Marker base: ABS
Text and project field: TPU

Temperature range:
-40° C do +90° C

Installation temperature:
+5° C do +40° C

Standard colours:
Yellow - white base, yellow text and project field.
White - white base, white text and project field.
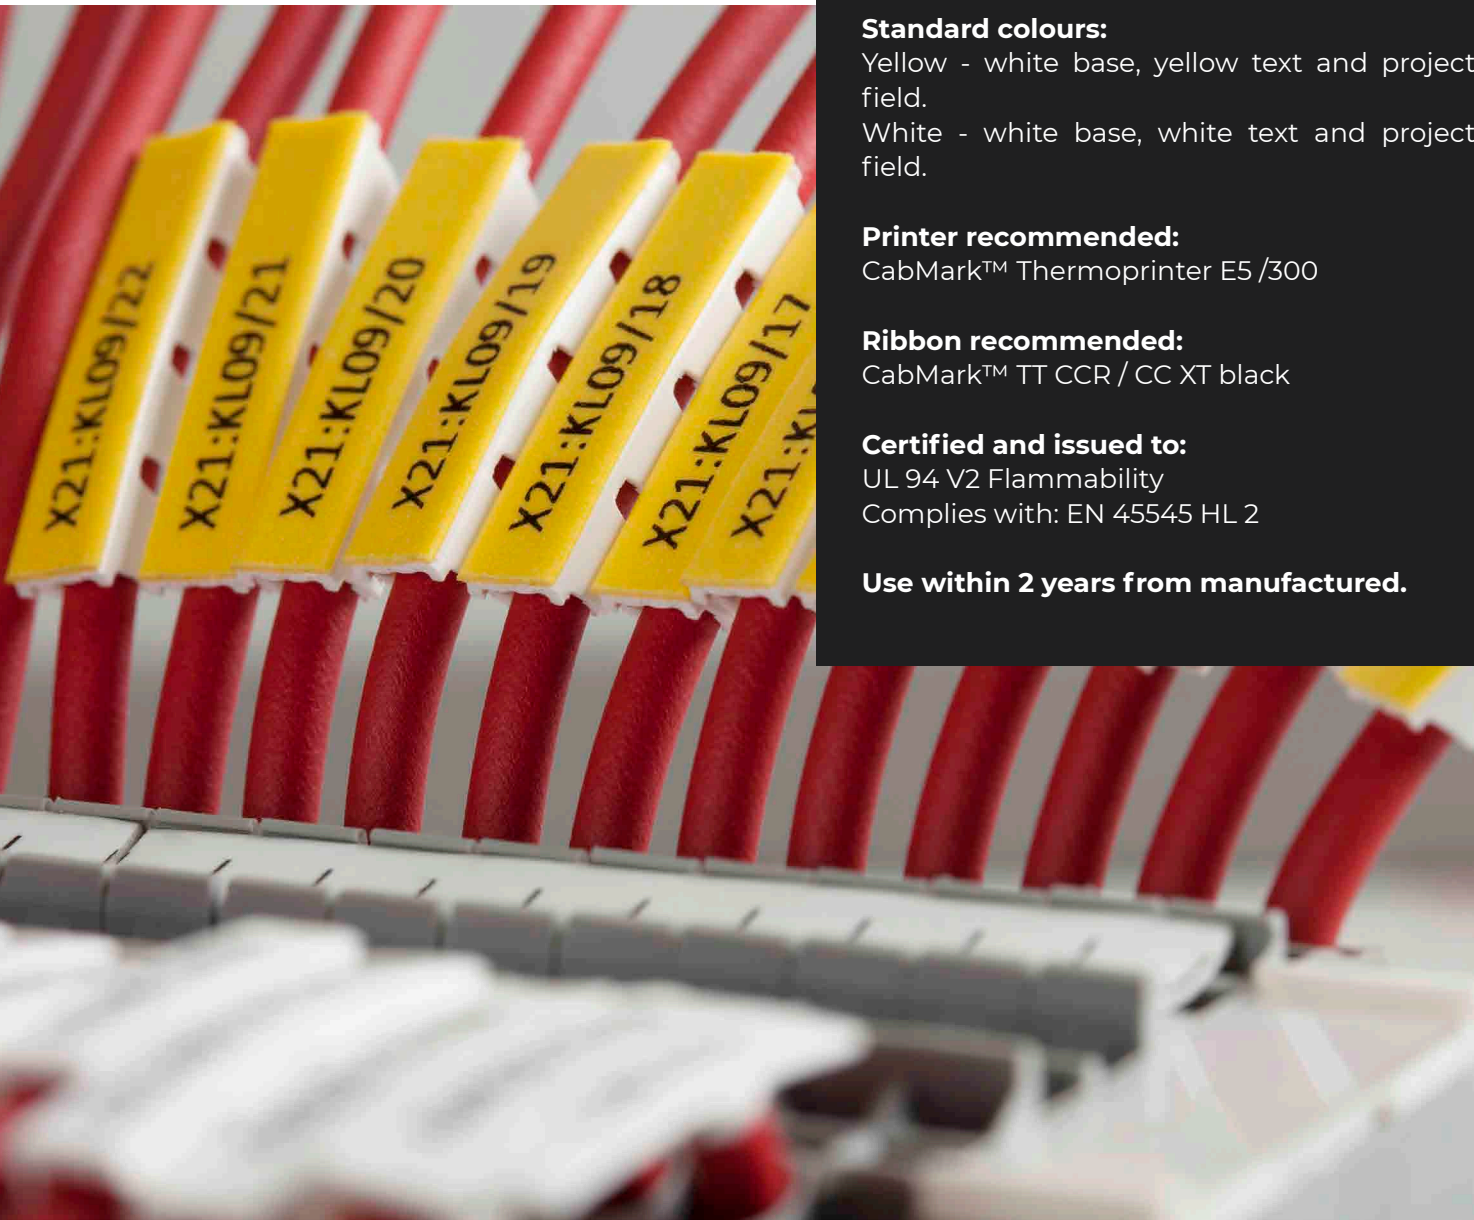

Printer recommended:
CabMark™ Thermoprinter E5 /300

Ribbon recommended:
CabMark™ TT CCR / CC XT black

Certified and issued to:
UL 94 V2 Flammability
Complies with: EN 45545 HL 2
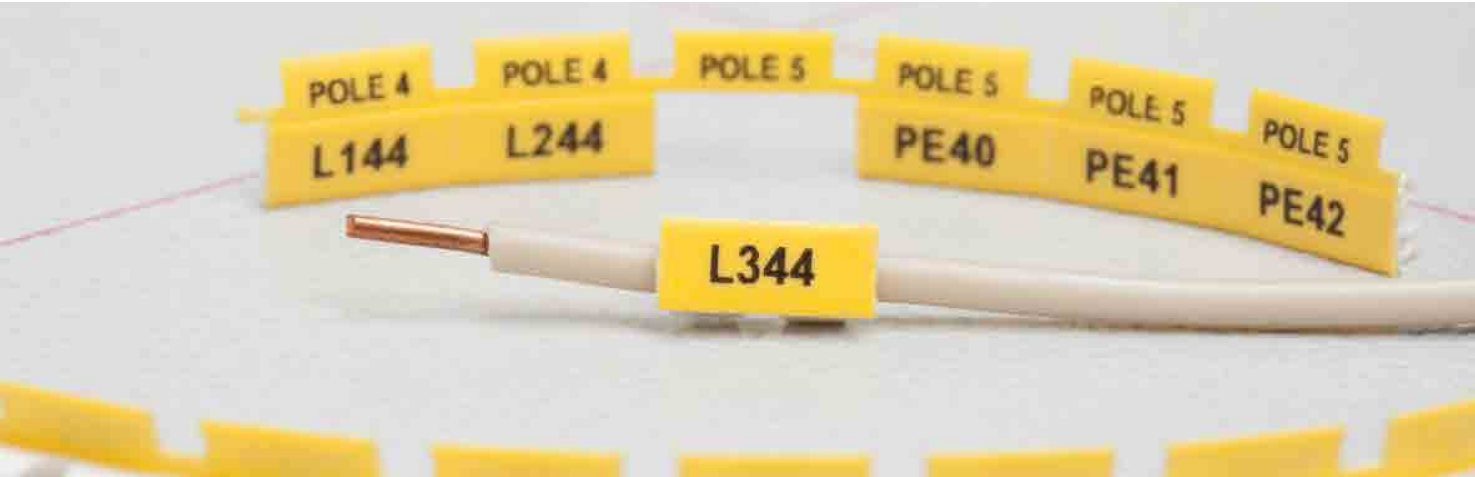

Use within 2 years from manufactured.

CabMark™ SQ

SQ Printer & Accessories

This is a printer with an extremely large range of industrial applications. It have been developed with focus on robustness, easy and convenient operation and high reliability.

- The SQ can do everything from tiny labels up to big, thick labels and continuous materials.
- Fast printing with 300dpi resolution (600dpi on request).
- Compact dimensions and weight for smaller workspace.
- 4,3" backlit touchscreen for easy operation.
- Compatible with Windows.
- Easy connection to PC or Laptop with USB 2.0.
- Built-in Ethernet socket for network operation.
- Save on material expenses with backfeed funtion.

CabMark™ includes a wide ranges of accessories for our printers. We offer only the absolute best products in the market.

If you do not find the accessory you are looking for please contact us.

CabMark™ MC-11 handles labels up to 115 mm wide and will wind a roll of labels up to a 220 mm diameter.

CabMark™ Label Dispenser LD-100-RS
Handles labels up to 115mm wide

CabMark™ WICON

Wrap-around applicator Wicon

For optimized productivity and quality of applicating WrapAraound's to wires, cables, strands, hoses, tubes or alike, spanning from 2-16 mm in diameter.

Our specialized CabMark™ CMW wraparounds protects your print persistently from liquid's, dust and wear.

Wraparound applicator Wicon in conjunction with the Thermoprinter SQ MP/300 will give you a bond, no wire can resist.

Insert your wire vertically into the applicator – and your print will be wrapped in an instant!
- This in a reproducible and consistent manor
- Your label will have optimal adhesion, given the circumstances you provide.
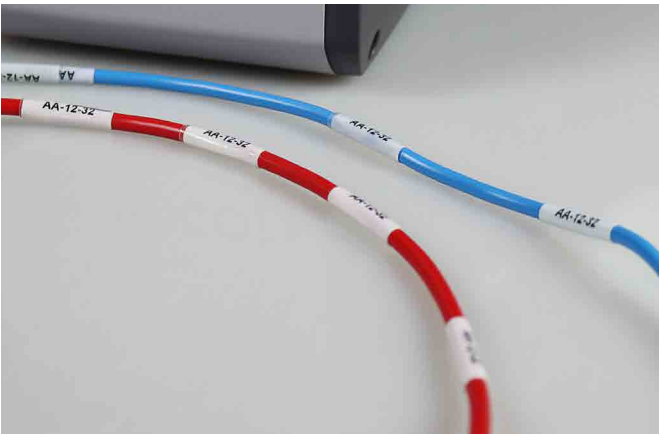

So ensure all surfaces are clean and free of lubricants.

Safety is of course well thought of; as a finger guard in the feed opening will prevent unwanted insertion in operating/process area.

Easy operation and maintenance is key for the Wraparound applicator WICON

– Contact Cabicon a/s for demonstration!
